

Founded in 2014, Ledger is the global platform for digital assets and web3. Over 20% of the world's crypto assets are secured through Ledger Nanos. Headquartered in Paris and Vierzon, with offices in London, New-York, Singapore and Portland, Ledger has a team of more than 700 professionals developing a variety of products and services to enable individuals and companies to securely buy, store, swap and manage crypto assets - including the Ledger hardware wallets line with more than 5 million units already sold in more than 180 countries.

Ledger combines a hardware wallet: Nano S Plus or Nano X and the Ledger Live app to offer consumers the easiest way to start their crypto journey while maintaining full control over their digital assets. With its ease of use, Ledger allows a user to begin investing in digital assets and ultimately, achieve financial freedom in a safe and stress-free environment, with additional education provided by its Academy. In addition to consumer products, Ledger has also developed Ledger Enterprise, a digital asset custody and security solution for institutional investors and financial players.
